When you select the **More details** drop-down option on a graph, you have access to additional information. The columns are sortable, and the information they will display will vary depending on which graph you're viewing. See below for a description of each column header in the More details information.

+ Date: This column will display the date that student incidents occurred (graphs: **Incidents Per School**, **Reviewed Items**, and **Incident Type**).

+ Date Range: This column will show the month that corresponds to the data displayed in the same row (graphs: **Incidents/Item Ratio** and **Items**).

+ School: This column will show the name of the school that is relevant to the displayed information (graphs: **Incidents Per School**, **Reviewed Items**, and **Incident Type**).

+ Student: This column will show the Gaggle ID of the student that is relevant to the displayed information (graphs: **Incidents Per School**, **Incident Type**, and **Top Concerns**).

+ Incident Type: This column will show whether an incident is a Violation, Questionable Content (QCON), or a Possible Student Situations (PSS) (graphs: **Incidents Per School** and **Incident Type**).

+ Content Type: This column will show whether the reviewed content or student items were **Email Messages**, **Files**, **Calendar Events**, **Videos**, or something else, depending on what services you have filtered (graphs: **Reviewed Items** and **Items**).

+ Total: This column will show the total number of items across all categories in the **Items** graph (graphs: **Items**).

+ Blocked Reason: This column will show why an item was blocked and reviewed (graphs: **Incidents Per School**, **Reviewed Items**, and **Incident Type**).

+ School Average: This column will display the school's average number of Incidents per Item in the **Incidents/Item Ratio** graph over a period of time (graphs: **Incidents/Item Ratio**).

+ Gaggle Average: This column will display the overall Gaggle average number of Incidents per Item in the **Incidents/Item Ratio** graph over a period of time (graphs: **Incidents/Item Ratio**).

+ Total Incidents: This column will display the sum total of incidents that an individual student has in the **Top Concerns** graph (graphs: **Top Concerns**).

+ Violations: This column will display the sum total of Violations that an individual student has in the **Top Concerns** graph (graphs: **Top Concerns**).

+ QCONS: This column will display the sum total of Questionable Content (QCON) that an individual student has in the **Top Concerns** graph (graphs: **Top Concerns**).

+ PSS: This column will display the sum total of Possible Student Situations (PSS) that an individual student has in the **Top Concerns** graph (graphs: **Top Concerns**).
